Applicant's election with traverse of the mechanically polished surface species in the reply filed on 3/ is acknowledged. The traversal is essentially on the ground(s) that the generic claims from which the claims drawn to the species depend are patentable over the prior art. This is not found persuasive as the rejections below demonstrate.

The requirement is still deemed proper and is therefore made FINAL.

Claims 8 and 10-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/9/2007.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sukimoto et al.

As alluded to in the restriction requirement, Sukimoto et al. discloses smooth aluminum tube stock that is polished with tripoli to produce a smooth surface. It is believed that such polishing will inherently produce a surface of at least 80 percent reflectivity since even unpolished aluminum can typically have reflectivity of 80 percent or more.

The preamble of claim 1 calls the claimed invention a “towel drier”, and the claimed surface is said to be “configured to contact and transfer heat to a towel to be dried”. These recitations concern the intended use of the claimed aluminum body, and are not deemed to structurally define over the aluminum body of Sukimoto et al. At most, such recitations require the prior art device be inherently capable of such use. See MPEP 2112. Clearly, the body disclosed in Sukimoto et al. would be capable of confining a heating fluid and contacting the surface of a towel. It is of no moment that Sukimoto et al. failed to contemplate such a potential use.

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH**

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
